

Noise

Did you know?

Noisy environments can impact a child's learning. Very loud noises can lead to permanent hearing loss.

Action Plan

- Avoid loud volumes on portable electronic devices, especially when using headphones.
- Choose toys that have a volume control. Tape over the speakers of very loud toys.
- Don't use firecrackers.
- If using a white noise machine to help your infant sleep, do not place it near the baby and play it at a low volume.
- Use hearing protection for you and your family at events with loud music.
- Create a quiet environment for your child to read and do homework.
- Worried about your child's hearing? Speak to your child's pediatrician.
