Sun Safety

Did you know?
Too much sun exposure can cause skin cancer, affect your vision, age your skin, and affect your immune system.

Action Plan

- Be safe in the sun! Everyone needs protection. Wear protective gear: swim shirts, sunglasses, long sleeves, and hats with wide brims.

- Use a broad-spectrum sunscreen with an SPF of 15 to 30. Apply enough to all exposed areas of skin. Re-apply often, at least every 2 hours, and after swimming or sweating.

- If possible, plan your outdoor activities outside the hours of peak sun (between 10am and 4pm). Seek shade when playing outside.

- The sun is one source of Vitamin D. Given the risks of too much sun exposure, talk to your pediatrician to make sure your child is getting enough Vitamin D through their diet or vitamin supplementation.

- Sunburn? When do I call the pediatrician? Call your child’s doctor if your baby is younger than one year old and gets sunburned or if your child older than one has sunburn-related blistering, pain, or fever.

Resources

For information from the American Academy of Pediatrics about how to protect your child from the sun, visit healthychildren.org, and search "sunscreen".
