

Indoor Air

Did you know?

more

VYSCHECK ORC

People spend about 90% of their time indoors where the air is usually 2-5 times more polluted than outdoor air.

Action Plan

- □ Reduce sources of pollution in your home:
 - Do not allow smoking inside.
 - If you smoke, quit: visit<u>smokefree.gov</u>
 - Avoid air fresheners, candles, and harsh cleaners.
 - Choose "low-VOC" products (example: paints).
 - Use a stove hood while cooking. With gas stoves, use an exhaust fan vented to the outdoors.
 - Fix water leaks to prevent mold.
- □ Let the fresh air in! Open your windows regularly.
- □ Wet dust and wet mop regularly to control dust.
- □ Install smoke alarms and carbon monoxide detectors.
- □ Test for radon in the basement, 1st and 2nd floors.

Resources

For strategies to improve your indoor air quality, visit <u>epa.gov</u> and search "Indoor Air Quality."

Check if you qualify for a free home visit from the NY State Healthy Neighborhoods Program, visit <u>health.ny.gov</u> and search "Healthy Neighborhoods."

The following Hudson Valley counties participate: Orange County, Rockland County, Westchester County

Learn more about safe and green cleaning, visit nyc.gov/health and search "Green Cleaning."
