Secondhand Smoke

Did you know?

Exposure to secondhand smoke increases the risk of asthma, lung infections, ear infections, and Sudden Infant Death Syndrome (SIDS).

Action Plan

☐ Do not allow smoking inside your home and car.

☐ Choose a smoke-free child care setting.

☐ Reduce smoke drift from your neighbors:
  ○ Seal cracks or gaps in apartment floors, walls, and around pipes with silicone.
  ○ Put a weather strip under and around the door.
  ○ Ventilate your home by opening windows.
  ○ Wet dust and wet mop regularly to reduce household dust. This might also help to reduce chemical residues from the smoke.
