Envision the Environment

What Does A Healthier NYS Look Like?

October is Children’s Health Month

The NYS Children’s Environmental Health Centers are seeking creative high school, college, graduate, and medical/allied health professional students to share your vision of what a healthy New York looks like to you as we move forward through the COVID-19 era.

Environmental health includes factors relating to clean air, water and food; chemicals in consumer products; healthy homes, schools, workplaces and neighborhood environments as well as transportation networks. How can we make a healthier environment?

Create an original video or other artwork that captures your vision. Select submissions will be posted on NYSCHECK.org, on NYSCHECK social media platforms, and presented at our Children’s Environmental Health Day celebration in October.

What’s your vision for a healthier New York for all New Yorkers?
Visit NYSCHECK.org for more.

Submissions due by September 28th, 2020

Eligibility
NYS high school, college, graduate and health professions students

Criteria
Original artworks only, including videos, drawings, paintings, animations, photos and mixed media. We want ideas and images created by YOU, the visionary. (Avoid using clip art, stock images or default application graphics.)

Submission form
https://j.mp/3aEUvza

Videos larger than 32MB can be submitted via link to the site they’re hosted on.
One entry per person

Can You See the Future?

Please maintain physical distancing and safe practices during your creative process
