

Environmental Pediatrics Appointment: What to Expect

Environment

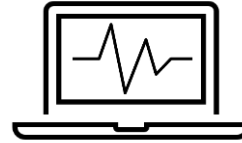

Conversation about your environmental health concerns

Detailed environmental exposure history

Health

Review of your child's medical records and symptoms

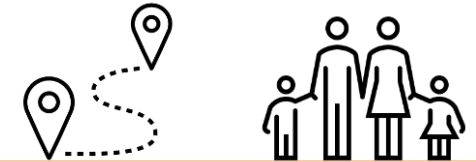

Exam. Lab tests *may* be ordered (e.g., allergy test, lead level)*

Next Steps

Connection to resources that help address environmental concerns

Follow-up plan for your family

*Our team continually reviews scientific evidence to determine best practices for medical testing. We currently do not order the following tests: mycotoxin tests, toxin panels (hair, urine, blood). However, we will discuss your environmental concerns at-length to develop a plan of action.
