

NYSCHECK Summer Academy

Environmental Health & Climate Justice Training Program

2025

Science knowledge is power.

The NYSCHECK Summer Academy is a free, part-time, virtual program designed to provide students of diverse training backgrounds the opportunity to develop skills and knowledge in children's environmental health and climate change advocacy. Over the course of eight weeks, students will engage in creative, collaborative, and critical thinking to address the health impacts of climate change and environmental exposures.

Fundamentals of Environmental Health

Dive deep into how climate change affects public health, especially in children.

Advocacy Skills

Work in teams to create advocacy projects that address climate change and health issues.

Apply Knowledge to Real-World Issues

Communicate environmental risks to diverse stakeholders, including legislators, patients, clinicians, and communities.

Collaborate Across Disciplines

Enhance your ability to work in interprofessional teams and form academic-community partnerships.

Lead Us Forward

Develop a career in environmental health and create the healthier world that we need.

8-Week virtual training program for high school, college, graduate, and medical students

Online live sessions with experts across NYS

**June 2-July 23, 2025
(Times to be determined)**
