

NYSCHECK Summer Academy

Environmental Health
& Climate Training Program

2026

Science knowledge is power.

The NYSCHECK Summer Academy is a free, part-time, virtual program designed to provide students of diverse training backgrounds the opportunity to develop skills and knowledge in children's environmental health and climate advocacy. Over the course of eight weeks, students will engage in creative, collaborative, and critical thinking to address the health impacts of climate and environmental exposures.

8-Week virtual training program for high school, college, graduate, and medical students

Online live sessions with experts across NYS

June 1–July 22, 2026

The NYS Children's Environmental Health Centers (NYSCHECK.org) are a network of academic medical institutions, organizations, and people dedicated to protecting children's health across our state.

We need future champions like you to accomplish our mission.

Fundamentals of Environmental Health

Dive deep into how climate affects public health, especially the health of children.

Advocacy Skills

Work in teams to create advocacy projects that address climate impacts on the health of diverse urban, suburban and rural communities across New York State.

Apply Knowledge to Real-World Issues

Communicate environmental risks to diverse stakeholders, including legislators, patients, clinicians, and communities.

Collaborate Across Disciplines

Enhance your ability to work in interprofessional teams and form academic-community partnerships.

Lead Us Forward

Develop a career in environmental health and create the healthier world that we need.
